# Connected Worker Platform

## Fusing Worker and Technology for Better, More Informed Decisions

### Overview

LogistiVIEW's Connected Worker Platform is an enterprise productivity toolset for the frontline worker. The software connects advanced technologies with the most critical resource that industry can harness: the power of human intelligence.

**Combining Augmented Reality, Artificial Intelligence, and computer vision, complex data is transformed into actionable insights for workers to make better, more informed decisions.**

Award-winning and actively deployed today, the Connected Worker Platform enables a new collaboration between worker and technology across Industry 4.0.

Delivering relevant data, at the moment of work, for rapid and accurate task completion

### Combining AR, AI, and the Worker

The platform combines leading computing and visualization technologies to enable the experience through:

- **Computer Vision** – Enables machines to “see” and analyze the environment
- **Augmented Reality** – Continuously guides the worker with intuitive visual instructions
- **IoT Integration** – Connects with sensors to create real-time picture of what’s happening around the operations floor
- **Artificial Intelligence** – Processes complex data streams to identify what is relevant
- **Workflow Engine** – Combines all of the above with the business’s own processes and systems, with flexibility to build a custom workflow for any procedure

## Platform In Action

LogistiVIEW delivers the:

- **Warehouse worker** with instant knowledge to rapidly fill an e-commerce order – immediately retrieving the right item with no uncertainty or lost time
- **Manufacturing worker** with visual kitting instructions in their field of view – making it easy to place all items correctly, throughout an entire 8-hour shift
- **Line supervisor** with real-time insights of how the team is performing against plan – visibility to monitor performance and adjust to optimize operations
- **Retail employee** with shelf stocking instructions to meet planogram specifications – replacing paper and delivering all hands-free
- **New seasonal worker** with training in minutes – not weeks – through instantly-recognizable visual and voice guidance

People empowered to reach their potential.

Technology as an enabler.

Combined forces making a meaningful contribution, together.

Unleashing workforce potential with intuitive technologies

## Simplify the Complex

- **Increase accuracy and efficiency** – make smarter, more informed decisions
- **Avoid costly errors** – make the right decision the first time, every time
- **Leverage existing systems and automation** – integrate with existing WMS and ERP systems to enhance existing automation
- **Integrate IoT tools** – connect with external devices, drive real-time insights to the worker
- **Train staff in minutes** – not weeks
- **Increase worker satisfaction** – empowered with state-of-the-art tools to confidently proceed through tasks and stay engaged throughout a shift
- **Design customized workflows** – easy-to-use workflow editor can be configured to support any task or procedure
