Flexible Warehouse Automation with LogistiVIEW

Is your automation **bolted down** to yesterday's needs? Unlock it today with LogistiVIEW.

At LogistiVIEW, we combine the power of Augmented Reality, Artificial Intelligence and Computer Vision to enable software configured flexible automation for warehouses.

What if you could easily create automation that's flexible and responsive to evolving business needs? With LogistiVIEW, warehouses can use augmented reality to reinvent processes that used to require bolts and brackets.

decisions

Adapt Fast, Achieve More

Identify your use case, build your workflows, and equip your workers with AR instructions on smart glasses. From there, the possibilities are endless.

Receiving, Inspection, Packing, etc

Improve processes that are often very manual with augmented reality instructions to help workers better identify and select the correct item, pallet, location, etc

Putaway, Replenishment, Pallet Building, Loading, etc

Improve handheld computer-driven processes with AR visual instructions that keep your workers heads-up and focused on their task

Picking & Sorting

Easily create and change virtual pick and put lights powered by AR smart glasses with no bolted hardware, wiring, or costly installation fees

Reinventing Fixed Automation

AR connects workers with machine assets to relieve bottlenecks, increase throughput of fixed automation, and expand the capacity of your warehouse

WHAT IS FLEXIBLE AUTOMATION?

“Flexible automation” combines your warehouse workforce with **Augmented Reality smart glasses and compelling visual instructions**. The result? Automation that can be scaled, moved, expanded and adjusted to business needs of tomorrow.

HOW DOES IT WORK?

Extend the capacity of your DC

Automation for what's next

Replacing Complexity. Unbolting for tomorrow.

Worker at the Epicenter

Leverage your most flexible asset, your existing workforce, equipped and empowered to achieve more – with data, intelligence, and real-time insights

LogistiVIEW Workflow Editor

Flexibility to build a custom workflow for any procedure, integrated with existing WMS and ERP systems to enhance existing automation, evolving with changing business needs

Powerful AR Visual & Audio Instructions

Smart glasses provide workers with a complete view of everything they need to know on the job – complexity replaced by intuitive instructions

Computer Vision & AI Connected to Software Systems

Enables machines to “see” and process complex data, amplifying your automation with intelligence and vision – the way automation should be done

Flexible Automation – where Augmented Reality enables the warehouse worker

Ready to take your automation to the next level? Contact LogistiVIEW today.
